Orthozon Technologies' Lumiere Retractor System Honored as Top Device for Spine

Written by Heather Linder | October 29, 2013

Orthozon Technologies' Lumiere Retractor System was recognized by Orthopedics This Week as one of the Top Ten Best New Technology advancements for spine.

The award goes to a device that is designated as creative, cutting edge and capable of having long-term significance. The Lumiere provides built-in lighting, translucent retractor blades and full medial access for surgeons to have a greater view.

The North American Spine Society presented the honor to the company at NASS' annual meeting in New Orleans earlier this month.
